

## Regional GDP per inhabitant in the EU25

# GDP per inhabitant in 2003 ranged from 33% of the EU25 average in Lubelskie to 278% in Inner London

In 2003, GDP per inhabitant<sup>1</sup>, expressed in terms of purchasing power standards<sup>2</sup>, in the **EU25's** 254 NUTS-2<sup>3</sup> regions ranged from 33% of the EU25 average in the region of **Lubelskie** in Poland, to 278% of the average in **Inner London** in the United Kingdom.

This information is taken from data released by **Eurostat, the Statistical Office of the European Communities**.

### One region in seven above 125% of the EU25 average...

The three leading regions in the ranking of regional GDP per inhabitant in 2003 were **Inner London** in the United Kingdom (278% of the average), **Bruxelles-Capitale** in Belgium (238%) and the **Grand Duchy of Luxembourg** (234%). Among the 37 regions exceeding the 125% level, seven were in **Germany**, six each in **Italy** and the **United Kingdom**, five in the **Netherlands**, three in **Austria**, two each in **Belgium** and **Finland**, one region each in the **Czech Republic**, **Spain**, **France**, **Ireland** and **Sweden**, and the **Grand Duchy of Luxembourg**. The only region in this group amongst the new Member States was **Praha** in the Czech Republic (138%).

It should be noted, however, that in some regions the GDP per inhabitant figures can be significantly influenced by commuter flows. Net commuter inflows in these regions push up production to a level that could not be achieved by the resident active population on its own. The result is that GDP per inhabitant can be overestimated in these regions and underestimated in regions with commuter outflows.

### ...and one in four below 75%

The six lowest regions in the ranking were all in Poland: **Lubelskie** and **Podkarpackie** (both 33% of the average), **Podlaskie** (36%), **Świętokrzyskie**, **Warmińsko-Mazurskie** and **Opolskie** (all 37%). Among the 60 regions below the 75% level, sixteen were in **Poland**, seven in the **Czech Republic**, six in **Hungary**, five each in **Greece** and **Italy**, four each in **Germany**, **France** (all overseas departments) and **Portugal**, three in **Slovakia**, two regions in **Spain**, and **Estonia**, **Latvia**, **Lithuania** and **Malta**. The lowest ranked region amongst the old Member States was **Norte** in Portugal (57%).

### Regional GDP per inhabitant in the EU25 in 2003

(in PPS, EU25 = 100)

1. GDP, and thus GDP per inhabitant, provides a measure of the total economic activity in a region. It may be used to compare the degree of economic development of regions. GDP does not measure the income ultimately available to private households in a region. Details of the methodology used can be found in "Regional Accounts Methods: gross value added and gross fixed capital formation by activity", **Eurostat**, 1995, ISBN 92-827-0159-X.
2. The PPS (purchasing power standard) is an artificial currency that takes into account differences in national price levels. This unit allows meaningful volume comparisons of economic indicators over countries. Aggregates expressed in PPS are derived by dividing aggregates in current prices and national currency by the respective Purchasing Power Parity (PPP).
3. These data are based on the Nomenclature of Territorial Units for Statistics adopted in May 2003. NUTS 2003 provides a uniform, consistent breakdown of territorial units for the production of regional statistics for the EU. Level 2 of the nomenclature has 254 regions: Belgium (11), the Czech Republic (8), Germany (41), Greece (13), Spain (19), France (26), Ireland (2), Italy (21), Hungary (7), the Netherlands (12), Austria (9), Poland (16), Portugal (7), Slovakia (4), Finland (5), Sweden (8) and the United Kingdom (37). Denmark, Estonia, Cyprus, Latvia, Lithuania, Luxembourg, Malta and Slovenia are all considered as single regions at NUTS 2 level. For a list of the European statistical regions see:
